DETAILED ACTION

1. This office action is in response to the amendment filed April 19, 2002.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claim 1-6, 8-18 are rejected under 35 U.S.C. 102(b) as being anticipated by Wang (U.S. 5,962,922).
4. Wang (Fig 2, 3C) discloses an electrode structure of a carrier substrate of a semiconductor device for solder-bonding the semiconductor device to a main substrate, said electrode structure comprising: a carrier substrate (10) having a hemispherical shaped recess (26) in a central area of a surface thereof; a hemispherical and cup shaped soldering land (262) of the electrode structure arranged and fixedly attached (via recess being coated to form land) in the recess that has a concentric hollow portion thereinside, said land having a inherent circumferential wall defining an interior hollow portion extending from said surface, and a passage (266) through an outer portion of said circumferential wall; and flange (264) wherein the said passage is at least one slit in said flange portion and a portion of an upper edge of said circumferential wall of said soldering land adjacent to said flange portion; wherein a package of said semiconductor device is a BGA (Column 2, Lines 8-9); said flange extends above a surface of said carrier; and wherein a through portion (12) is at least

Art Unit: 2827

one slit in said flange portion and said slit extends from said flange portion to a position adjacent a bottom of said cylindrical circumferential wall surface.

Claim Rejections - 35 USC § 103

5. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

6. This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

7. Claim 7 is rejected under 35 U.S.C. 103(a) as being unpatentable over Wang in combination with Lau (Chip Scale Package).

8. Wang does not explicitly disclose that a package of the semiconductor device is of a Chip Scale Package type (CSP).

9. However Lau teaches the use of CSP.

Art Unit: 2827

10. It would have been obvious to one of ordinary skill in the art to form a package of the semiconductor device in Wang as a Chip Scale Package type (CSP), in order provide increase device density and easier burn in as taught by Lau (Preface).

Conclusion

11. Any inquiry concerning this communication or earlier communications from the examiner should be directed to James Mitchell whose telephone number is (703) 305-0244. The examiner can normally be reached on M-F 10:30-8:00.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, David L. Talbott can be reached on (703) 305-9883. The fax phone numbers for the organization where this application or proceeding is assigned are (703) 305-3432 for regular communications and (703) 305-3230 for After Final communications.

Any inquiry of a general nature or relating to the status of this application or proceeding should be directed to the receptionist whose telephone number is (703) 308-0956.
